

## Product information/New Aromatherapy Product Range

I have produced a range of natural toiletries and skincare products. Each product is hand made using natural base ingredients with added pure essential oils. Below is a list of products available along with information and safety data related to the product. This is also added to the label. I have purposely not used highly stimulating oils in the majority of my products as many can aggravate health issues such as high blood pressure, and so on. If you are unsure whether a product is suitable for your requirements, please contact me. Alternatively, if there are any products that you do not see listed that you require, please ask and I will gladly help.
