

Doctor's Referral Form

My name is **Janet Thornton**. I am an ITEC fully qualified Aromatherapist.

Aromatherapy massage is the ancient art of applying essential oils to the skin using special hand techniques. The process helps with relaxation, to loosen tight muscles, unblock tissues and is soothing to the nervous system.

Essential Oils are selected for compatibility with your skin type, your health and also your needs. They moisturise the skin, offer a wonderful aroma and help to produce new skin cells.

The following form relates to a potential client which is currently under your care.

Name:

Address:

The above client has indicated that he/she may have possible contra-indications, but is very keen to have an Aromatherapy treatment. This will help with general wellbeing. In order for treatment to proceed, I need to verify that your patient is able to undergo an Aromatherapy treatment. It would be greatly appreciated if you could give your approval for treatment, plus an indication of any necessary precautions. (Many thanks for your co-operation.)
