

**The Bio-Energiser Detox SPA system is a revolutionary treatment designed to re balance your body. It creates renewed energy levels and a feeling of well being. The Bio-Energiser kick starts your natural detoxification process.**

### **The Benefits**

The Bio-Energiser Detox Spa starts the process of rebalancing your body's bio-energy. Effectively rebalancing the cells equilibrium of positive and negative ions which, in turn, 'kick starts' the dispersal of the unwanted toxins. The renewed re-balancing of the cells ensures re-hydration resulting in optimum efficiency of their function to extract nutrients and dispose of unwanted waste. The result will be renewed energy levels, both physical and mental, with a general feeling of well being.

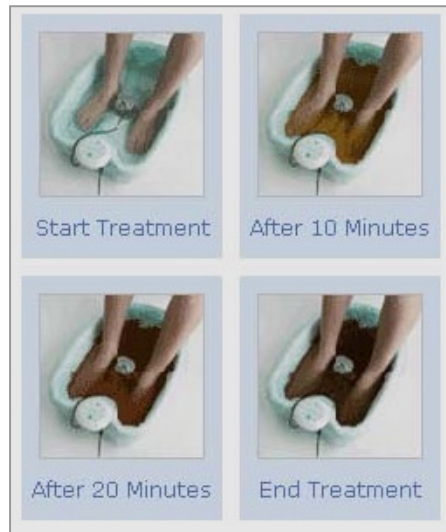

### **The Treatments**

The relaxing 30-minute treatment involves placing your feet into a spa bowl filled with warm salted water. An Energizing Cartridge creates a flow of electrons and a bioenergetic field that provides a relaxing and enjoyable treatment. The feet have an amazing 2000 pores in each foot and therefore offer one of the best points to administer the treatment, which is both efficient and convenient.

The Bio-Energiser helps to rebalance and harmonise by sending signals up through the lymph glands to stimulate the detoxification process. The Bio-Energiser is used in hospitals around the world for hypo hydrosis (sweaty hands and feet) cases. In addition it also helps to cure the symptoms of athletes foot. Results have been excellent. Clients report hugely increased feelings of well being and with over a thousand testimonies gathered this is an outstanding aid to wellness.

Modern lifestyle takes its toll on your body more so than you realise. This becomes particularly apparent when examining the balance of bio-energy in your body's cells. When your cells are functioning correctly they allow vital nutrients to be absorbed into your body, which in turn results in the elimination of unwanted toxins.

Your cells bio-energy can also be unbalanced by poor diets, a lack of fresh fruit and vegetables, little or no regular exercise, drugs, anaesthetics, illness, disease, stress, worry, smoking and alcohol.

Any of these can cause poor nutritional absorption which will, in turn, stop the cells from functioning correctly resulting in the inability to rid the body of unwanted toxins. Excessive toxins have many adverse effects on the body, which can include poor skin conditions, colds, flu, sinus problems, lethargy, tiredness, headaches, migraines, breath & body odour, arthritis, lower-back pain, oedema and MS.

A course of Bio-Energiser Detox Spa treatments can help to rebalance your body and is a significant advancement in aiding wellness and a feeling of well-being.

During the treatment the client remains clothed during and sits in a chair with shoes and socks removed. Please allow approximately one hour for a short consultation, half hour treatment and aftercare. Please note the contraindications to treatment listed below.

*Detox Foot Spa treatments are **not** recommended for people fitted with demand style pacemakers, during pregnancy (unless medically advised), children under 7 or for patients with open wounds, bruising, excessive abrasions or broken skin on their feet, skin infections, metal implants in the lower leg, organ transplant in the last 12 months, epilepsy, acute infectious disease, severe circulatory disorders, recent haemorrhage or illnesses of unknown origin.*

Testimonial: " I was sceptical as to the benefits but after my first treatment I could not believe the new levels of energy that I was experiencing within the first 24 hours, simply amazing! " KS
